

Ignacio Fernandez-Marenchino was born in Córdoba, Argentina. Ignacio is an agricultural engineer, he studied in the college of agricultural sciences at Universidad Nacional de Córdoba. As a third-year undergraduate student he was awarded the position of teaching assistant in the ruminant nutrition department. During his assistantship, Ignacio was introduced to Dr. Diwakar Vyas, with whom he began a yearlong internship program at the University of Florida, after his graduation in 2018. During his internship, he met Dr. Nicolas DiLorenzo, with whom he began an internship in 2020 at the UF/IFAS North Florida Research and Education Center in Marianna, Florida, resulting in an invitation to begin a master's degree in 2022. Ignacio's research focuses on the effects of pre- and probiotic additives in beef cattle diets.
