

Leandro O. Abdelhadi grew up in Coronel Brandsen, Buenos Aires, Argentina, where he worked on his family's beef cattle farm, which included cattle from cow-calf to stocker and feedlot production systems for internal and external market. In 1997, Leandro graduated from the Universidad Nacional de La Plata with a Doctorate in Veterinary Medicine and obtained a MS in Animal Production from the Universidad de Mar del Plata-INTA Balcarce in 2000. Currently, Leandro is enrolled in a PhD program at the Universidad Nacional de La Plata and the University of Florida, North Florida Research and Education Center (NFREC) in Marianna, Florida under the tutelage of Dr. Guillermo A. Mattioli and Dr. Nicolas DiLorenzo, respectively, with his research focusing on grain sorghum silage, effects of processing and storage time on performance and digestion of backgrounding beef cattle. Leandro has more than 24 years of experience in the ruminant nutrition industry, and during this time he has given 335 conferences and/or technical dissertations and published 140 articles in journals and scientific meetings around the world. Leandro is currently employed as a forage and grain nutrition consultant for beef and dairy enterprises across 15 countries from North, Central, and Latin America, as well as Europe. He is also involved in research and extension for seeds companies (Advanta Seeds), machine companies (Claas Argentina), nutrition companies (Provimi, Cargill), and as an Associate investigator at the University of Florida-NFREC, since 2016. Leandro's last position was a ST Consultant for the International Finance Corporation (IFC)-World Bank Group (MAS Advisory Services – LAC), which focused on livestock production systems integrated with agriculture.
