Intake & Behavior Data Collection Super SmartFeed Service Information

Description

The Super SmartFeed is a useful tool for supplementing cattle under grazing conditions

- Portable
- Solar & battery powered
- Contains 4 feed bins (hoppers)
 - Various dry feedstuff can be utilized (pellets, grains, etc.)
 - Provides predetermined amount of feed per head*
 - Feed settings are adjusted according to needs
 - RFID technology allows for precision feeding
- Cattle are trained to utilize the Super SmartFeed during an adaptation period
 - Most cattle will utilize the Super SmartFeed

Deliverables

- Feed intake
- Feeding behavior

Health Requirements & Sick Cattle Management

Health records are requested prior to delivery

- Cattle should be up-to-date on vaccinations

If veterinary assistance is required, the client will be notified immediately

- Sick cattle will be handled on a case-by-case basis

Service Rates

UF-affiliated clients \$2.00 / head / day

Non-UF affiliated clients \$2.70 / head / day

The service rate includes facility maintenance, labor, data management and associated service contract fees, and supplies related to service. *Service rates are for use of the Super SmartFeed only and do not include feed or housing costs.
