

Federico Tarnonsky was born in La Plata, Buenos Aires, Argentina where he was always under the influence of the biological sciences as his father is a veterinarian and his mother a medical doctor. Federico studied Agricultural Engineering at Universidad Nacional de La Plata. In 2015, he began working as teaching assistant for the Department of Forage and Grassland Management and assisted with the University beef farms until graduation in 2018. Federico also collaborated on Extension Projects with small, local dairy producers which enabled him to join the Pro-secretary of Social Policies of Universidad Nacional, where he acted as a territorial coordinator at one of the extension centers. During his assistantship, Federico was introduced to Dr. Nicolas DiLorenzo, with whom he began an internship in 2019 at the UF/IFAS North Florida Research and Education Center in Marianna, resulting in an invitation to begin a master's degree in 2020.
