

Andres G. Fernandez Lehmann was born in Maracaibo, Venezuela in 1996. Andres has been involved in his family's cattle business since childhood, which led him to identify his interest in the performance of animals, specifically cattle. With the goal of ultimately working in the feed or meat industry, Andres completed his undergraduate degree in Animal Production Engineering at Rafael Urdaneta University (Venezuela) in 2019. After contacting Dr. Nicolas DiLorenzo in 2021, Andres was invited to pursue a MS at the University of Florida, beginning in 2022. Andres' research focuses on the use of additives in beef cattle diets.
